

Setup CCI Email on an Android 5 Device using the Email App

1. Open the **Email** app using the icon

- a. If the app doesn't take you to the "Setup email" screen, tap the **three vertical dots** to the right of Inbox

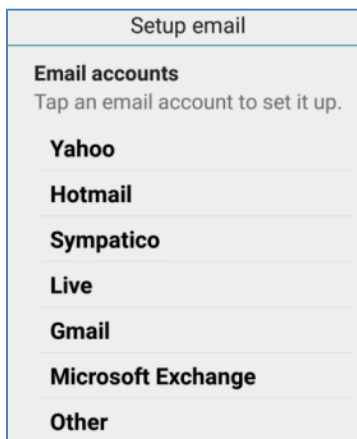

- b. Tap **Settings**

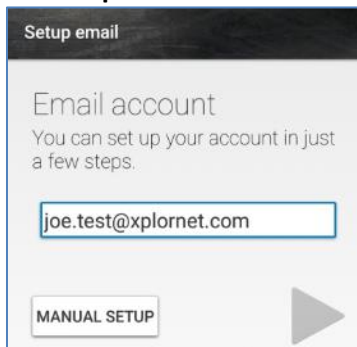

- c. Tap the **+** sign at the bottom left

2. Tap **Other**

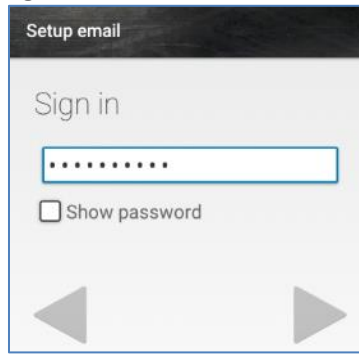

3. Enter your **email address** and then tap "**Manual Setup**"

4. Tap **IMAP** for "**Account type**" – POP3 is an option but is not recommended

5. Enter your email **Password** and then tap the **right arrow >**

The screenshot shows a mobile application interface titled "Setup email". Under the heading "Sign in", there is a text input field containing a masked password (represented by dots). Below the field is a checkbox labeled "Show password" which is currently unchecked. At the bottom of the screen, there are two grey triangular navigation arrows pointing left and right.

6. For the **Incoming server settings**
- Change the **Domain/Username** to your **full email address**
 - Enter the **Server** as **mail3.cciwireless.ca**
 - Verify the **Security Type** is **SSL/TLS**
 - Verify the **Port** is **993**

The screenshot shows a mobile application interface titled "Incoming server settings". It contains several configuration fields: "DOMAIN\USERNAME" with the value "joe.test@xplornet.com"; "PASSWORD" with a masked password and a "Show password" checkbox; "SERVER" with the value "imap.xplornet.com"; "PORT" with the value "993"; "SECURITY TYPE" with a dropdown menu set to "SSL/TLS"; and "IMAP path prefix" with the value "Optional". At the bottom, there are two grey triangular navigation arrows pointing left and right.

- e. Tap the **right arrow >**

7. For the **Outgoing server settings**
 - a. Enter the **SMTP Server** as **mail3.cciwireless.ca**
 - b. Verify the **Security Type** is **SSL/TLS**
 - c. Verify the **Port** is **587**
 - d. Change the **Username** to your **full email address**

Outgoing server settings

Only download attachments over Wi-Fi

9. Give this account a **name** (optional) and tap the **right arrow >**

Your account is set up and email is on its way!

Give this account a name (optional)
joe.test@xplornet.com

Your account is now ready for use in the Email app on an Android 5 mobile device.

Changing Your Password

If you **changed your email password** in [webmail](#), you will need to change it in the Email app to match the new password.

1. Open the **Email** app using the icon

2. You may get error messages like “Couldn’t sign in” or “Please sign in to your email”:

3. Tap the **three vertical dots** to the right of Inbox

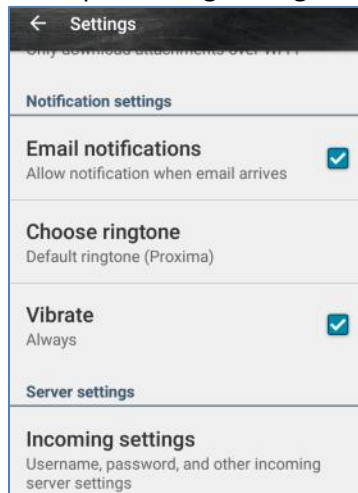

4. Tap **Settings**

5. Tap your **Account name** (typically your **email address**)

6. Scroll down to **Server settings** at the bottom and tap **Incoming settings**

7. Enter the new email **Password** that you set in webmail

DOMAIN\USERNAME
joe.test@xplornet.com

PASSWORD
