

Setup Email in the Outlook Mail App on a Windows 10 Phone

Add a new email account

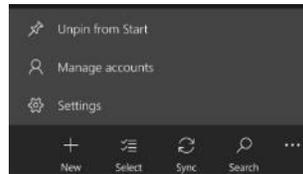

1. Open the **Outlook Mail** app on the Start screen, or from the All apps list.

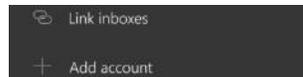

2. If this is the first time you've opened the Outlook Mail app, you'll see a Welcome screen. Tap **+ Add account** to get started.

- a. If you've used the Outlook Mail app before, at the bottom right of the screen, tap the ellipsis (...), and then choose **Manage Accounts**.

- b. Tap **+ Add account**.

3. Tap **Other account (POP, IMAP)**

4. Enter your full **Email address**, your **name** and your email **Password**, then tap **Sign in**

Options for syncing your content

9. Scroll down and tap **Advanced mailbox settings**

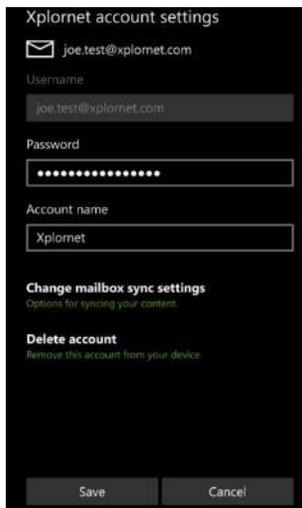

10. Scroll down to the bottom.

- a. Verify that the **Incoming email Server** is **mail3.cciwireless.ca:993:1**
- b. Verify that the **Outgoing (SMTP) email Server** is **mail3.cciwireless.ca:587:1**
- c. Verify that **the following four boxes are checked**:
 - **Outgoing server requires authentication**
 - **Use the same user name and password for sending email**
 - **Requires SSL for incoming email**
 - **Requires SSL for outgoing email**

11. Tap **Done** when finished and then **Save**

Changing your Email Password

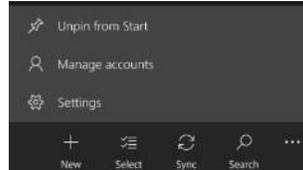

If you **changed your email password** in [webmail](#), you will need to change it in the Outlook Mail app to match the new password. You might even see a message like “Your account settings are out of date” or “We couldn’t access this account”:

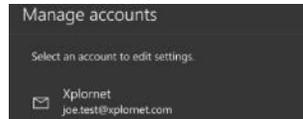

1. Open the **Outlook Mail** app on the Start screen, or from the All apps list.

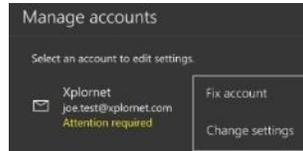

2. At the bottom right of the screen, tap the ellipsis (...), and then tap **Manage Accounts**.

3. Select your email address.

- a. If it shows **Attention required**, then tap **Fix account** after selecting you email address

4. Enter your new email **Password** and tap **Save**
