

CCI User Help Guides: Windows Live Mail Setup

This document shows how to setup your email using the Windows Live Mail client.

1. From the Start menu (or a desktop shortcut), **open Windows Live Mail**.
2. In the top navigation bar, click on **"Accounts."** This will display a new menu.
3. Click **"Email"** in the new menu.

4. In the window that appears, **enter your CCI email address**, e.g. john.doe@cciwireless.ca.
5. Check the box next for **"Manually configure server settings."**
6. Click **"Next."**

7. In the next screen, fill out the information as follows (image below Step 8):
 - a) Server Type: select **"IMAP"** from the drop-down menu.
 - b) Incoming Server address: **"mail3.cciwireless.ca"** without quotes
 - c) Incoming Port: **"143"**
 - d) Logon user name: enter the username you use to access your email.
 - e) Outgoing Server address: **"mail3.cciwireless.ca"** again without quotes
 - f) Outgoing Port: **"587"**
 - g) Check the box for **"Requires authentication."**
8. Click **"Next."** On the next screen, you will confirmation that your account was added.

Windows Live Mail

Configure server settings

If you don't know your email server settings, contact your ISP or network administrator.

Incoming server information

Server type:

Server address: Port:

Requires a secure connection (SSL)

Authenticate using:

Logon user name:

Outgoing server information

Server address: Port:

Requires a secure connection (SSL)

Requires authentication

9. Click **"Finish."** Windows Live Mail will attempt to sync with the server.
If you get an error message, check that you correctly entered the settings in Step 7. If you see the error message more than once, please call Tech Support at 1-888-240-2224.
10. Your account has now been added to Windows Live Mail. You can use the email application as you usually would.
